

# Start with PSAT 8/9 and Grow with Khan Academy

Use your PSAT 8/9 Math score to find interactive practice resources on Khan Academy that will help with what you're learning in class.

## If Your Math Score Is Between 120 and 280

To continue to grow your skills, click on the following links to these Khan Academy resources:

- [Writing expressions with variables](#)
- [Evaluating an expression with one variable](#)
- [Intro to rates](#)
- [Converting units](#)
- [Solving percent problems](#)
- [Representing data](#)

## If Your Math Score Is Between 300 and 380

To continue to grow your skills, click on the following links to these Khan Academy resources:

- [Linear word problems](#)
- [Multi-step linear equations review](#)
- [Inequality word problems](#)
- [Distributive property with variables](#)
- [Rates and proportional relationships](#)
- [Graph interpretation](#)
- [Solving proportions](#)

## If Your Math Score Is Between 400 and 480

To continue to grow your skills, click on the following links to these Khan Academy resources:

- [Interpreting linear expressions](#)
- [Compare linear functions in different representations](#)
- [Intro to systems of equations](#)
- [Inequality word problems](#)
- [Adding and subtracting polynomials in one variable](#)
- [Multiplying binomials](#)
- [Quadratic formula](#)
- [Unit conversions](#)
- [Percents](#)
- [Recognizing functions from verbal descriptions](#)
- [Mean, median and mode](#)

## If Your Math Score Is Between 500 and 580

To continue to grow your skills, click on the following links to these Khan Academy resources:

- [Solving linear equations and inequalities](#)
- [Linear inequality word problems](#)
- [Number of solutions to equations](#)
- [Number of solutions to a system of equations](#)
- [Linear equations with fractions and decimals](#)
- [Operations with polynomials](#)
- [Features and forms of quadratic functions](#)
- [Choosing the best measure of center](#)
- [Mixture word problem](#)
- [Interpreting scatter plots](#)
- [Identifying and using the line of best fit](#)

- [Population proportions](#)
- [Calculating conditional probability](#)
- [Scatterplots](#)

- [Rate of change word problem](#)
- [Conditional probability using two-way tables](#)
- [Growing by a percentage](#)
- [Multi-step rate and unit problem](#)
- [Sampling methods](#)

## If Your Math Score Is Between 600 and 720

To continue to grow your skills, click on the following links to these Khan Academy resources:

- [Solving linear equations and inequalities](#)
- [Interpreting linear functions](#)
- [Linear Inequalities word problem](#)
- [Linear functions word problem](#)
- [Systems of linear inequalities word problems](#)
- [Systems of linear equations](#)
- [Number of solutions linear systems](#)
- [Linear and quadratic systems](#)
- [Solving quadratic equations](#)
- [Exponential and quadratic word problem](#)
- [Manipulating exponential expressions](#)
- [Operations with polynomials](#)
- [Isolating quantities](#)
- [Ratios, rates and proportions](#)
- [Scatterplots](#)
- [Impact on median and mean](#)
